To Whom It May Concern

York axles are fitted in our 45 Trailers and out of this 11 trailers are with TecAir1 Suspension. We are using these axles since last 4 years. Our Trailers are Skeletal. We are loading container and trailers are running from Mumbai to Maharashtra and Gujrat road. We are happy with YORK product performance. York axle having excellent features like Hub grease interval at 1 lac kms, good brake efficiency, heavier axle beam with solid spindle are just making these axles most reliable in India. And also after sales service support is excellent. York is my most preferred choice for Trailer components.

Thanking you,

For Sahyadhri Logistics Pvt. Ltd.
