

BUILDING STRONGER COMMUNITIES

Investing in Education

York also donated computers to the Government School in Dehu, helping students gain access to digital learning resources and essential computer skills. By enabling better access to technology, the initiative aims to prepare young learners for future academic and professional opportunities.

Supporting Better Healthcare

To strengthen medical infrastructure, York donated a sonography machine, dialysis machine and wheelchairs to PCMC Government Hospital, Thergaon. These contributions will help improve diagnostic services, support patients requiring regular treatment and enhance overall patient care for communities in and around Talegaon.

A Commitment Beyond Business

Through initiatives like these, York continues to invest in the well-being of communities, creating a positive impact through healthcare, education and long-term social development.

Expanding Service Across Eastern India

York has taken another step towards bringing service closer to its customers with the inauguration of two new service centres in Jharsuguda and Jamshedpur, in partnership with Rishav Automobile.

The inauguration was attended by Mr. Gautam Datta, Mr. Gurumukh Singh, Managing Director, Mr. Bikash Pahadi, CFO, along with

members of the York Sales and Service team.

As fleets continue to grow across Eastern India, the need for accessible and reliable service support has never been greater. These new centres are designed to provide faster assistance, technical expertise and comprehensive service solutions, helping customers keep their operations running smoothly.

Customer Spotlight

Steel and Carriers

In coal transportation, every trip demands strength, stability and reliability. For Steel and Carriers, led by Mr. Anup Singhal, these qualities are essential to keeping operations moving across the industrial region of Angul, Odisha.

The company operates a fleet of 100 tip trailers, built for heavy-duty coal movement in challenging road and mining conditions. To support this demanding application, the fleet is equipped with York Mechanical

Suspensions and York 5661 – 1950TL Axles.

Together, this axle-suspension combination delivers dependable load handling, greater stability and long-lasting performance, helping Steel and Carriers reduce maintenance concerns and maintain smooth fleet productivity.

Product Spotlight

York Tyre Rakshak

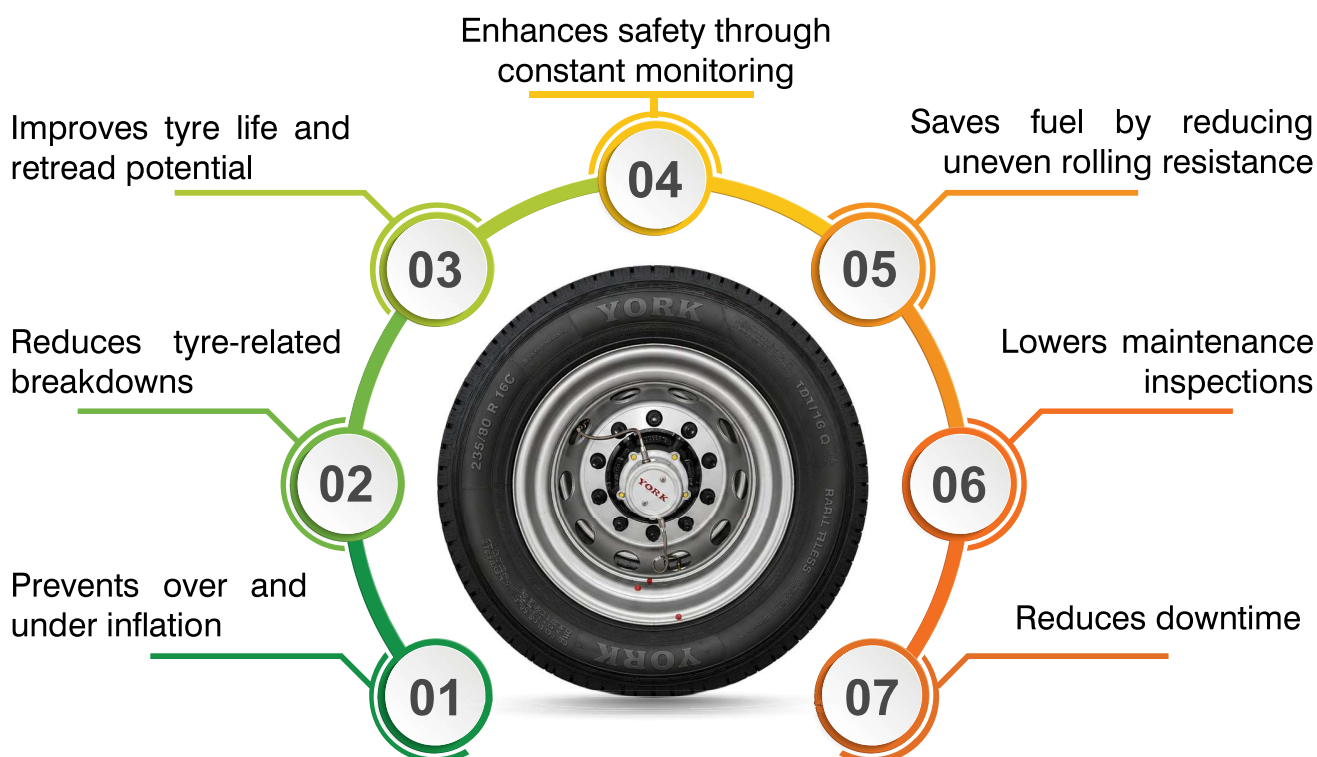

Tyres play a big role in fleet efficiency, safety and operating costs. Even a small pressure difference between paired tyres can lead to uneven wear, higher fuel consumption, frequent breakdowns and avoidable downtime.

To solve this, York introduces Tyre Rakshak - India's first tyre equalisation system for heavy-duty trailers and commercial vehicles. It continuously balances tyre pressure

between paired tyres, helping prevent overinflation and underinflation across demanding applications.

With constant pressure equalisation, Tyre Rakshak helps fleets improve tyre life, reduce maintenance needs, enhance safety and lower operational costs.

Key Benefits

Built with York's commitment to innovation and reliability, Tyre Rakshak helps fleets run safer, smarter and more efficiently on every journey.
